

Spring Recruitment Methodology

Offer Stage

Spring manages the position offer and acts as a liaison on the negotiations and the process for both you and the successful candidate through to an employment contract.

We will keep in touch during the period that the successful candidate is integrated into your business. A timely review of the process is also part of our continuous improvement culture and helps us ensure that you are completely satisfied.

Follow Up

We support both you and the candidate in preparation for the interview and selection process. We can arrange interviews and offer our premises as a venue, if this is helpful.

> Interview **Management**

of Candidates

Interview Stage

Every candidate that Spring

presents has been extensively

interviewed, with our recruiters

gaining a detailed understanding

of their skills, attributes and true

capabilities.

Presentation

We introduce you to the best-fit candidates.

Update

Throughout the process, we keep you updated and answer any questions that you may have.

Candidate Screening

Having screened potential candidates and established a skills match to the role, we complete reference checks and liaise with other individuals, as necessary.

the recruitment process to begin.

Join Forces

Start!

Assignment of a professional recruiter to your organisation who gains a detailed understanding of your business, its structure, its challenges and its culture.

Role-Specific Requirements

The recruiter establishes the formal requirements for your recruitment needs and provides you with an accurate recruitment summary.

Extending the Research

Search We utilise our extensive database, far-reaching network, connections, and expand our search via relevant traditional and social media channels, as required.

The recruiter communicates directly with those who actually make the hiring decision. This is essential in gaining credible intelligence into the technical and personal attributes that will align best for performance and fit.
